

I was stuck in Atlanta traffic today and wanted to know what was going on. I turned from xm back to the radio and searched around trying to find out. I was still unable to locate a channel covering the traffic in what I consider a reasonable time. This makes me feel that the NAB is not doing a decent job covering these things and there needs to be room for others to take up the slack. XM radio is an incredible thing. Help it to become even better. I understand that NAB has a powerful lobbying force, but that cannot be allowed to influence public policy. I don't care what goes on up there, but the fact of the matter is that limiting the right of XM to offer traffic and weather is unconstitutional. I subscribe to XM and I am going to expect those things now. Represent PEOPLE like me, not the lobbying forces of large corporations with their bank accounts.
